

AbundaTrade.com believes in smart consumerism

Wasteful consumerism and global warming have become increasingly substantial concerns in today's society. We want stuff, and not just any stuff; we want the newest and the coolest, and we spend millions of dollars and throw out tons of perfectly good stuff in order to have it. It is wasteful spending that hurts our pockets and wasteful manufacturing and trashing that hurts our planet.

Luckily, not all consumerism is wasteful. At AbundaTrade.com, smart consumerism means saving your money, putting your unwanted stuff back into the system rather than into a landfill, and getting the newest, coolest stuff that you want. When you are a smart consumer, you create a win/win scenario for you and the environment.

In the past two years **we have repaired and re-circulated over 50 tons of CDs and DVDs** that would otherwise be wasting away in closets, garages or landfills. According to the WorldWatch Institute, about 45 tons of used CDs become waste each month. We are working every day to dramatically impact this growing waste.

In Our Vision, the Trade is not only a great deal for you, it is an opportunity for us to work together as smart and mindful consumers to truly make the world a better place.

"I believe each of us can make a difference and that a company operated with the right model and principles can make a significant difference."

Kent Wagner, AbundaTrade.com
